

Grim Gradient Frame — Spec

Animated conic-gradient border with optional sheen trigger.

Tokens

```
component.frameBorder.width = 3px  
component.frameBorder.radius = {core.radius.lg}  
component.frameBorder.palette.start = #3BA1FF  
component.frameBorder.palette.mid = #7ED1C6  
component.frameBorder.palette.end = #49433F  
component.frameBorder.speed.rotate = 24s  
component.frameBorder.speed.sheen = 900ms
```

Usage Notes

- Apply class `.grim-frame` to any container; put content inside `.grim-frame__body`.
- Rotation runs continuously; toggle sheen by adding `.is-sheen` (JS hook provided).
- For perf on mobile, consider `prefers-reduced-motion` and pause rotation.
- Colors inherit from CSS vars; override `--frame-c1`, `--frame-c2`, `--frame-c3` per theme.
